

Egis Science and Technology Centre

Egis Science and Technology Centre (ESTC) was established with the aim to present the magical world of pharma production and the high-tech, 21st century practice of generic pharmaceutical research and development. Egis Pharmaceuticals PLC, whose activities cover the whole pharmaceutical value chain from generic research and development to production, offers highly informative visits for professional audiences on three floors of the Centre. With its cutting-edge multimedia devices and applications, Egis Science and Technology Centre provides a great number of interesting professional facts and interactive multimedia content for its visitors.
